

Paper Recycling Toss

ACTIVITY

Celebrate Earth Day and baseball season at the same time with this simple game. Enlist student volunteers to crumple recycled paper and newspapers into tight balls. Have them make a big box of them to use for various activities. Have younger kids toss from a short distance and older kids from a farther distance into large recycling bins.

EXTENSION

Put throwing skills and aim to the test by adding smaller containers along with the big recycling bins. Gather recycled coffee cans, oatmeal containers, and large yogurt containers, and see if older students can hit these targets.

SKILLS

Motor skills, hand-eye coordination, and strength are all used in this activity.
